Lumina™ RF Wireless Room Control System

Simple energy saving wireless retrofits for conference rooms

The Lumina™ RF Wireless Room Control System delivers a scalable solution for code-compliant wireless lighting controls for conference rooms.

Lumina RF Wireless Room Controls deliver wireless control for any on/off, 0-10V and phase cut dimming application. This scalable wireless solution provides the flexibility to easily build a system to meet the unique lighting needs of any space.

Start with a Room Controller for simple switching, dimming and scene control. Then add additional components for multi-location control, occupancy/vacancy sensing, daylight harvesting and more. For additional convenience, the system is configured using the Lumina RF Wireless App— the only setup tool needed.

CHALLENGE
